Brighton, UK

Profile.

I'm an aspiring UI/UX designer who strives to create meaningful solutions and experiences for everyday problems, with experience taking concepts from initial research phases, all the way to project delivery. I have a strong attention to detail as well as a creative, problem-solving mindset which helps with the development of ideas. I can also effectively work both individually and as part of a team in professional workplaces.

When I'm not designing, I stay busy primarily by working out, watching sport and socialising. My other passions include travelling, skiing & music/Dj-ing.

Experience.

2023 - Current

Freelance Web Designer

I've undertaken numerous jobs designing websites from scratch or developing existing sites to improve usability and visual design, including overall branding. These jobs include e-commerce stores and client booking systems.

2021 - 2022

Creative Designer

theUp.co (Innovative Energy Solutions LTD)

My role was to support all sectors across the company with any design related tasks ranging from pitch decks, on-boarding guides, web maintenance, digital assets and print material with fast paced deadlines. I often worked alongside brands such as Guinness, Smirnoff, Corona, Love Corn and established hospitality venues.

Achievements.

2023

Finalist

Royal Society of Arts Student Design Awards

2022

Diploma in Industrial Studies (DInts)

Loughborough University

2020

Bronze Award

Starpack Award Visual Design & Packaging
